City on a Hill (Easter version)

Key: C | Song Key: C | Capo: 0 | Notes:

```
Am                        F
There is a city on a hill,
C                         G
There is a cross in the darkness
Am                   F                        C      G
Jesus died for us and changed the world
Am                   F
There is a city on a hill,
C                         G
There is a tomb that is empty
Am                   F                        C      G
Jesus' love for us can change the world.

Am                                   F
Let my light shine, let my light shine,
                  C      G
let my light shine.
Am                                   F
Let my light shine, let my light shine,
                  C      G
let my light shine.
    Am           F        C              G
If Christ is risen who can stand against us.
Am                               F
Let my light shine, let my light shine,
                  C      G
let my light shine.
    Am           F        C                  G
If Christ is risen who can stand against us.
Am                               F
Let my light shine, let my light shine,
                  C      G
let my light shine.
